

HOUSE DOOR **COLLECTION**

The collection represents a harmonious combination of modern engineering and minimalist aesthetics. Each model is not just an entrance unit, but a style statement that protects your home's privacy. We present several models with different filling options, including both double-glazed units and decorative stainless steel finishes. Make your project perfect with **Framex!**

STEEL PANEL

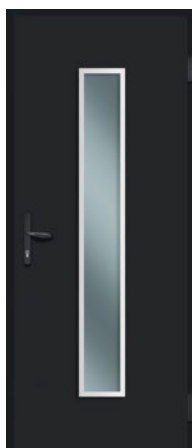

Modern entrance door models combine aesthetics and functionality: an enhanced metal panel, double-glazed units with frosted glass, and mouldings, which visually expand the space and give the doors a sense of solidity. The silver metallic shine of the décor against a contrasting panel creates a clear geometry, while the black textured finish adds classic elegance. Thanks to a wide selection, the doors can be perfectly designed to complement the style and architecture of the building.

PVC PANEL GLS

Trend minimalism, where geometry and contrast play a key role in the world of doors, while also intersecting with high quality. Doors with laminated sandwich panels offer a harmonious combination of the aesthetics of natural materials and modern technology, giving the door a finished look and making the design more expressive.
